SKILLS

- Web Design
- Design Thinking
- Wireframe Creation
- Front End Coding
- Problem-Solving
- Computer Literacy
- Version control systems
- Strong Communication

PROFILE

As a detail-oriented and creative web developer, I am passionate about creating visually appealing and user-friendly websites. My expertise lies in front-end development, where I specialize in using HTML, CSS, and JavaScript to design and implement responsive websites.

PROJECTS

PACMAN GAME WITH JAVASCRIPT

One of my most challenging yet rewarding projects was creating a game using JavaScript. I was determined to succeed, so I immersed myself in research and gained a deep understanding of web game development and design tools such as Canvas.

PERSONAL PORTFOLIO

My latest project is a personal portfolio website where I showcase my work. The site has a cool feature where you can switch between light and dark modes depending on your preferences. The gallery section is where I display my projects, with eye-catching thumbnails that give you an idea of what each project is about. Clicking on each project takes you to a detailed page with more information and links to relevant resources.

EDUCATION

SECONDARY SCHOOL

Green Space School
2017 - 2021

BACHELOR OF SCIENCE

Islamic University of Lebanon
2022 - Present
